

DESCRIPTION

The main function of the electric baking cage is to replace the carbon baking cage, making the drying of tea more precise and controllable.

Earlier, the drying and roasting of tea were mainly processed by burning charcoal, but the temperature of the charcoal roasting is uncontrollable, and the quality of the tea made is different. Due to the development of electrification, electric baking cages are commonly used for drying now.

Due to its small output, this machine is very suitable for small tea factories, tea shops and households. It can also be used to dry other types of food and has a wide range of applications.

This machine can also be used for baking dry oolong tea and white tea, enhance their fragrant. It also could be used for perfume incense.

ADVANTAGE

1. Intelligent constant temperature system control. The operation is simple and fast, the baking is more accurate and more intelligent;
2. Traditional craft, hand weaving. Unique craft design, natural moso bamboo weaving, combining traditional crafts with modern technology;
3. Thicker molybdenum disilicide heating tube, uniform heating, no pollution, safety and guarantee;
3. The base is stable. The base is formed by moulding, low center of gravity, good stability, good quality, not easy to be deformed, strong and durable.
