

DESCRIPTION

[The tea mixing and flavoring machine](#) is mainly used for mixing and blending operations of CTC tea, herbal tea, traditional tea, blended tea, etc. At the same time, it can spray atomized liquid into the machine, which can greatly mix the internal materials evenly.

The machine can be set with timing spray function and intermittent spray function to meet different mixing standards for different materials.

With time control function and cover sealing function, even if the inside is powdery material, it will not leak out and cause pollution to the environment.

The residual pressure recovery device is used to stop spraying immediately after stopping spraying, and the residual pressure will automatically return to the water tank to avoid excessive spraying.

ADVANTAGE

1. Electromagnetic door stopper to ensure that the door can be sealed to prevent dusty materials from escaping;
2. The whole machine is made of 304 food grade stainless steel, which is sturdy and durable;
3. Adopting a full-enclosing structure, which increases the aesthetics;
4. Water washing function can be used to facilitate cleaning and maintenance;
5. The bottom has a water collection function to prevent water from flowing directly to the ground;
6. With timing function, it will automatically alarm when the time is up.
