

## DESCRIPTION

Though picking tea leaves by machine is becoming more and more common at present, leaves or tea branches of different sizes will appear.

If manual selection is used, it will consume a lot of labor costs and time costs. After the fresh leaf grader machine is developed, the subsequent selection costs are greatly reduced. Different sizes of tea can be selected to facilitate selective processing. Good raw materials are used to produce high quality tea, and ordinary raw materials are used to produce ordinary quality tea.

The roller is made of pure natural bamboo, which is hygienic and environmentally friendly, and will not damage the tea. It is one of the indispensable equipment for processing high quality tea by mechanical tea picking.

## ADVANTAGE

1. The drum is made of bamboo material, which is hygienic and environmentally friendly;
2. Using electromagnetic speed control motor, the speed is stable and durable.

## SPECIFICATION

Fresh green tea leaf sorting machine specification list:

Model	DL-6CQFJ-70
Dimensions(L*W*H)	1850×900×1200 mm
Voltage	380/50 V/HZ
Diameter of big hole	20 mm
Diameter of small hole	15 mm
Driving power	0.37 kW
Motor speed	1400 r/min
Rated voltage	380 V
Rotating speed of roller	20 r/min
Output	250 Kg/h

If you have special need, it can be customized according to the needs of customers.
