

## DESCRIPTION

This [gas heating Tea Roasting Pot](#) highly imitates the process of manual tea roasting; the industry's first pot can rotate 360 degrees, the tea is heated without dead corners, and the fixation is more uniform.

We are the first company in the industry to install hot air pipes on the pot body. You can choose whether to blow hot air into the machine. The hot air can quickly drain the water vapor from the pot to prevent the tea from being stuffed and affecting the tea quality. The tea made from this machine has almost the same taste as the tea made by an experienced teacher. If you want to produce high-quality tea, this machine can greatly improve the quality of your tea.

This machine uses gas heating, energy-saving, and environmental protection, and the thickness of the steel plate is 6mm. The quality of the tea is even, which is completely close to the tea produced by hand. It is an ideal machine for producing high grade tea!

## ADVANTAGE

1. T-shaped combustion fire platoon covering the tea fixation barrel, burning area up to 100%.
2. There are three valves at the bottom, which can be manually ignited in case of power failure, so tea leaves are not wasted.
3. Automatic solenoid valve design, heating automatically starts and stops, the solenoid valve automatically closes when the temperature reaches the set temperature, and the machine stops heating. When the temperature is lower than the set temperature, the solenoid valve opens and the machine reheats, which can save fuel.
4. Preserve the design of the combustion head of the constant burning flame, reserve the constant burning flame after the ignition is successful, re-ignite from the constant burning flame, reduce the pressure of the ignition needle and the ignition coil, and improve the service life.

## APPLICATION

[Tea Roasting Pot](#) is suitable for processing black / green / oolong / white / dark / herbal tea, the following is the working time required for the above tea production.

Type Of Tea	Working Time
Green Tea	15-20 Minutes
Oolong Tea	15-20 Minutes
Herbal Tea	15-20 Minutes

The above data is for reference only, and the specific processing time shall be determined according to the actual situation.

## SPECIFICATION

1. 功率 1.55kW

## Tea Fixation Pot DL-6CSTG-100

Voltage: 220 V 50HZ  
Heating Type: Gas  
Pot Diameter: 100 cm  
Pot Depth: 95 cm  
For Green/Oolong/Yellow Tea

Capacity 25 kg / batch  
Gas (LPG / LNG) Heating  
For Best Quality Green Tea

**L:178cm W:130cm H:155cm**

[Gas Heating Tea Roasting Pot](#) specification list:

Model		DL-6CSTG-100
Dimension		1300×1780×1550 mm
Voltage		220/50 V/Hz
Pot inner diameter		1000 mm
Pot inner depth		950 mm
Drive motor	Power	0.5 KW
	Speed	1400 rpm
	Voltage	220 V
Pot speed		5-37 rpm
Heating type		Gas
Efficiency		20 kg/batch

If you have special need, it can be customized according to the needs of customers.
