

DESCRIPTION

The [Tea Leaf Collecting Machine](#) is mainly used for tea picking in mountain, hilly, plain and other terrain. It is produced with international advanced technology. It has the advantages of low noise, large air volume, stable quality and high production efficiency. It is an ideal machine for tea picking.

4C-S39 [New Tea Collection Equipment](#) using HUASHENG 139F 4 stroke, 31 CC, 0.7KW gasoline engine, the noise is lower than the 2 stroke and is more fuel save than the 2 stroke engine. The performance is more stable, and will not extinguish at high temperature. Tea picking is more efficient and efficiency is 40 times that of manual labor.

ADVANTAGE

For the tea producing areas with large leaves and the special needs of picking lavender and other flower, we have developed a new type of increased turret, which is 10 cm higher than the conventional one, which greatly improves the picking efficiency.

Each set of tea picking machine is free of charge with a 6-meter long nylon cloth bag, which is wear-resistant and durable. The bag has a tie rope, and the working length can be adjusted arbitrarily.

[New Tea Collection Equipment](#) after 20 years of continuous optimization and improvement, now all parts are produced by ourselves, we ensure that every part is of the best quality, and the service life is increased by 100% compared with peers!

The structure of the blowpipe is optimized. The air volume of each duct is uniform and the wind is more stronger, tea leaf into tea bags faster.

DETAILS

Ergonomic handle design, reasonable balance weight of knife rest, more labor-saving tea picking.

SK5 carbon tool steel has been quenched with high hardness and strong wear resistance. It can cut 1 cm thick branch directly.

Independently designed fan blade and fan cover, plastic fan and aluminum fan are available for higher strength and more sufficient air volume.

Since eight years ago, we were not satisfied with using gearbox accessories of the same poor quality as other peers. We spent hundreds of thousands of dollars to build our own gearbox components, which increased the life of the machine by 100%.

SPECIFICATION

[Tea Leaf Collection Machine](#) specification list:

Model	DL-4C-S39
Cutting Width	40/50/60 cm
Engine Model	HUASHENG 139F
Stroke	4 Stroke
Displacement	31 CC
HP	0.9 HP
Power	0.7 KW
Total weight	10.2kg

Specification of all of [Tea Leaf Collecting Machine](#).

Model	Engine	Stroke	Power
DL-4C-H3	HONDA GX35	4 Stroke	1.35 KW
DL-4C-H2	HONDA GX25	4 Stroke	0.81 KW
DL-4C-Z	KOMATSU G26LS	2 Stroke	0.81 KW
DL-4C-T	MITSUBISHI TU26	2 Stroke	0.7 KW
DL-4C-S	HUASHENG 1E34F	2 Stroke	0.7 KW
DL-4C-A	NATIKA 1E34F	2 Stroke	0.7 KW
DL-4C-S39	HUASHENG 139FA	4 Stroke	0.7 KW

If you have special need, it can be customized according to the needs of customers.
