

DESCRIPTION

DL-6CPYS-170 [tea leaf plane circular screen sorting machine](#) is one of the special screening machines for primary and refined tea factories. Used to separate the length of the twisted tea and the size of the block in the tea processing technology. It is suitable for various sieving operations of black tea, green tea and oolong tea.

ADVANTAGE

This machine is composed of two parts: the circular screen machine and the conveyor belt. Separately driven by electric motors.

The tea leaves to be processed enter the conveyor belt from the tea bucket, and then enter the sieve bed through the conveyor belt. After being sieved by the four-sided sieve, the tea leaves are poured into the tea pallets from the tea outlet to complete the sieving operation of the tea.

The main shaft of the machine is equipped with an eccentric block, which has the effect of reducing vibration. It is an indispensable machine in the tea making process.
